

ENERGY MANAGEMENT POLICY

PT. Pindo Deli Pulp and Paper Mills is committed to implement a responsible purchasing and using energy in the most efficient, cost-effective and environmentally responsible manner throughout our Power Generator premises and its distribution equipments.

Towards this end, we shall :

- improve energy efficiency continually by implementing effective energy management programs that support all operations and customer satisfaction while providing a safe and comfortable work environment
- control the significant use of fossil fuel that can impact the environment and may affect the global climate change
- implement of energy management improvement projects which are applicable to all employees, subcontractors and other interested parties
- accomplish saving initiatives to optimize generated energy at most efficient fuel use and cost
- ensure availability of information and necessary resources to achieve energy objectives and targets.

We will therefore establish Energy Management Team who implement the following tasks :

- Identify and assess the significant energy utilization,
- Set, implement and monitor the realization of reliable working plan, program and action plan to accomplish the complete energy efficiency project and emission control,
- Set a model to optimize energy cost based on efficiency and fuel factor in the joint operation of GFPP and CFPP,
- Comply with applicable legal and other requirements related to energy use, consumption and efficiency,
- Provide framework for setting and reviewing energy objectives and targets,
- Develop and provide energy-efficient equipments / technology and services for energy generation, maintenance and offices,
- Communicate, train and/or educate our employees, related subcontractors and interested parties whenever applicable to enhance the project implementation,
- Deliver regular report to the Top Management and concerned Stakeholders regarding the Mill Energy Management System achievement as required.

The Policy and Energy Management System will be regularly reviewed to ensure our commitment to energy performance improvement.
