

ENERGY MANAGEMENT POLICY
PT. Indah Kiat Pulp & Paper Tbk. – Perawang Mill

We, the PT. Indah Kiat Pulp & Paper Tbk. (PT. IKPP) Perawang Mill realize that we consume energy continuously to produce pulp, paper and tissue. In line with the operations, we commit to conduct a responsible energy generation practice and use in the most efficient, cost-effective and environmentally responsible manner throughout our Power Generator premises.

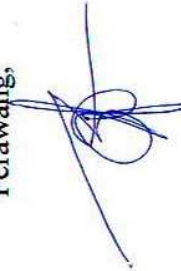

We are aware that the conservation of energy is directly related to the environmental pollution and green house gas emission. As big industry, we commit that we continually make every effort to achieve the best energy usage practice, reduce energy cost, economic sustainability and environment sustainability.

Furthermore, IKPP Perawang commit to:

1. Implement effective Energy Management System that support all operations and customer satisfaction
2. Ensure continual improvement in our energy performance through improvement projects which are applicable to all employees, subcontractors and other interested parties to achieve the best energy performance bench marked.
3. Establish the energy objectives target and action plans, and review periodically,
4. Set, implement and monitor the realization of reliable working plan, program and action plan to accomplish the complete energy efficiency project and emission control.
5. Ensure the availability of information and of necessary resources to achieve objectives and targets
6. Comply with all the legal requirements and other requirements related with energy conservation.
7. Consider the best energy performance improvement in design, upgrade and modification of facility, equipment, system, processes and new projects.
8. Commits to procure Energy Efficient products and services, clean energy development process and/or design them for energy performance improvement whenever required.
9. Communicate this policy to all our employees, contractors and stakeholders. Train/educate all our employees and contractors to follow best practices of energy conservation.

The Policy and Energy Management System will be regularly reviewed and updated as necessary, to ensure our commitment to energy performance improvement
