

PT YTL Jawa Timur Energy Management System

Energy Policy

We, PT YTL Jawa Timur, commit ourselves to improve our energy performances continuously by establishing and implementing Energy Management System (EnMS). This EnMS is supported by effective energy management programs throughout our operational systems while providing a safe and comfortable work environment. We will ensure that all requirements stipulated in any relevant standards are met.

In addition, we will regularly review and update as needed our EnMS and ensure that :

1. We comply with all applicable regulatory and statutory requirements on energy management system
2. It is communicated to our employees and encourage them to contribute in energy conservation programs
3. We promote the purchase of energy efficiency products and services, and constantly encourage our suppliers and contractors to develop and implement their own energy efficiency programs
4. We continually adopt utility wide best practices to enhance our energy performance, and
5. We provide the framework for setting and reviewing energy objectives and targets, including the necessary information and resources needed to achieve them
