

ENERGY POLICY

PT.Indah Kiat Pulp & Paper Tbk. – Perawang Mill

We, the PT. Indah Kiat Pulp & Paper Tbk. (PT. IKPP) Perawang Mill realize that we consume energy continuously to produce pulp, paper and tissue. In line with the operations, we commit to conduct a responsible energy generation and use in the most efficient, cost-effective and environmentally responsible manner throughout our Power Generator premises. We try to even exceed the best practices by continual improvement projects. IKPP Perawang commits to implement effective Energy Management System, comply with legal requirements and other requirement while providing a safe and comfortable work environment.

We are aware that the conservation of energy is directly related to the environmental pollution and green house gas emission. As big industry, we commit that we continually make every effort to achieve the best energy usage practice, reduce energy cost, economic sustainability and environment sustainability.

Furthermore, we shall :

1. Implement effective energy management programs that support all operations and customer satisfaction
2. Reduce the specific energy consumption and energy intensity for production process (pulp & paper) and product distribution operation process.
3. Ensure continual improvement in our energy performance through improvement projects which are applicable to all employees, subcontractors and other interested parties to achieve the best energy performance bench marked.
4. Establish the energy objectives target and action plans, and reviewed periodically,
5. Set, implement and monitor the realization of reliable working plan, program and action plan to accomplish the complete energy efficiency project and emission control. Ensure the availability of information and of necessary resources to achieve objectives and targets
6. Comply with all the legal requirements and other requirements related with energy conservation.
7. Consider the best energy performance improvement in design, upgrade and modification of facility, equipment, system and processes.
8. Commits to procure Energy Efficient products and services, clean energy development process and/or design them for energy performance improvement whenever required.
9. Communicate this policy to all our employees, contractors and other interested parties. Train/educate all our employees and contractors to follow best practices, conserve energy and maintain environment.
10. Communicate and cooperate transparently with regulatory authorities, communities, energy providers/suppliers and professional groups to ensure timely, reasonable, cost effective solutions to the energy issues.

The Policy and Energy Management System will be regularly reviewed and updated as necessary, to ensure our commitment to energy performance improvement
