

The Energy Policy of PT. Nippon Shokubai Indonesia is:

We, PT. Nippon Shokubai Indonesia, are committed to carrying out its operations in an environmentally responsible manner, including our use of energy. We are going to continually improve our energy performance.

We achieve this improvement in energy performance through the implementation of an energy management system which includes the following:

- We provide the framework for setting and reviewing energy^{<1>} objectives and targets to support continuous improvement in how we improve^{<1>} energy performance^{<1>}.
- We make the necessary resources and information^{<1>} available to achieve these objectives and targets.
- We ensure that all personnel whose activities significantly affect our energy use are adequate trained.
- We develop measures to demonstrate our energy performance.
- We purchase energy efficient products and services where economically feasible.
- We develop designs for energy performance improvement.^{<1>}
- New projects will undergo an energy review to ensure that their energy use is as low as technically and economically feasible.

We comply with all legal and other requirements which apply to our energy use, consumption and efficiency^{<1>}.

This policy will be updated regularly to ensure that it continues to demonstrate our commitment to good energy management.

This policy is communicated to all employees of PT. Nippon Shokubai Indonesia.

HIROYUKI TAKAKI
